

Concentrated and raw materials for dilution & textile chemical formulators

Product Name	Chemical Structure	Solid %	Application
WT RPD-70	Sodium dioctyl sulfosuccinate	70	Excellent wetting agent in pretreatment , dyeing and washing operations for the textile industry.
NGH - 60	Sodium glucoheptonate	60	Excellent sequestration power over a broad range of metal ions . Extremely high sequestration capacity for Fe 3+ Compatible with strong alkali solutions & stable across wide pH range Excellent peroxide stabilization
PA-45	Sodium polyacrylate	40	Highly effective as dispersant and sequestering agent
FIX KS conc	Cationic polyamine based condensation product	60	Formaldehyde free dye fixing agent for reactive and direct dyestuffs.
BAC-50	Benzalkonium chloride	50	Retarders in dyeing of acrylic fibres with cationic dyestuffs.
PGO – PCO	PEG esters , Glycerol Ester , Polyol Ester , Sorbitol Ester , Mono-/Di-Ester	100	Emulsifiers , leveling agents , dispersants , lubricating agents , Antistatics
P11 - P12	Phosphated esters	100	Highly alkali stable , low foaming wetting , emulsifying and dispersing agents Antistatic , leveling agents
PRET C conc	Glyoxal based wrinkle free resin	70	Cross-linking agent for extremely low formaldehyde wash-and-wear finishing of textiles
SOFT PRF	Paraffin wax emulsions	35	Waterproofing , yarn knittability , greasing and waxing of the textiles , Improves sewing efficiency , sizing of warp yarns
SOFT PE conc	Polyethylene wax emulsions	40	Cationic and nonionic additives for stitch sewability , improvement in abrasion resistance , tensile strength , tear strength , softness , anti-static effects
DAS %100	Solid – Polyester polymer	100	Antiback staining agent for denim washing . Prevents re-deposition of Indigo in denim processing
KKS conc	Silicone based defoamer	70	Concentrated , shear stable and high temperature resistance . No risks of spot
KKY-70	Oil based defoamer	50	Concentrated non-silicone defoamer , effective over a wide of pH range
SOFT MC conc	Macro silicone emulsion	60	Concentrated non-silicone defoamer , effective over a wide of pH range
SOFT SY-J	Micro silicone emulsion	55	Super concentrate , excellent gliding and high surface smoothness properties
EXTRA SOFT	100% Aminofunctional Siloxane	100	Super concentrate , excellent softness , improved elastic recovery
SOFT JET %100	Hydrophilic silicone oil - nano	100	Low yellowing , excellent softness Jet stable hydrophilic silicone , jet stable , no risks of spot
KS-JET %100	Hydrophilic softener	100	Hydrophilic softener with excellent gliding properties – paste
DMZ %100	Demineralization agent	50	3-5 times stronger than standard product available in the market
CLEAR PRA	Sulfinic acid derivative	50	Has an excellent reductive effect in acidic dyebaths
KT %100	Polymeric anticleasing agent	100	Powder – universal anticrease agent

Product Name	Chemical Structure	Solid %	Application
P-15 B	Non-polymeric lubricant with multifunctional properties	100	Excellent antcrease agent , promotes leveling , acts as an effective emulsifying agent in dyeing bath.
DF EDR %100	Powder – Dye solubilizer / leveling for reactive dyestuff	100	Excellent dye dispersing and leveling agent
DF CR %100	Benzoate derivative	100	Raw material for ecological carrier , diffusion accelator and levelling agent on PES dyeing
DFT conc	Ethoxylated derivatives	100	Levelling agent for PES dyeing
DF RTD	Ethoxylated derivatives	100	Levelling and dispersing agent for PES dyeing
RM-2025	Ester of high molecular alcohols	100	Raw material for PES dyeing , gives good running properties, improves fastness during reduction clearing bath
WO MS 300	Raw material for Polyamide dyeing	100	Dispersant and levelling agent for dyeings of wool and polyamide 6 and 6.6
OLG C	Raw material for oligomer dispersant	30	Excellent dispersant for oligomers , prevents deposition of the oligomers even at higher temperatures
FIX ZNR %100	Condensation product of high molecular weight sulphonic acids	100	Powder , fixing agent for PA fiber
NEUTRAACID 200	Blends of eco friendly acids and salts	45	Ensures the adjustment of weakly acid up to neutral pH values as they are required in compliance with the OekoTex Standard 100
WT-F %100	Anionic alcohol ethoxylate phosphate	94	One bath scouring and dyeing agent with excellent detegency for elastane containing textiles
WT RN %100	Nonionic wetting and oil removing ethoxylated chemicals	100	Excellent wetting and oil emulsifier , suitable for liquid dosing systems
WT OLS %100	Nonionic wetting and oil removing ethoxylated chemicals	100	Excellent low foaming wetting and detergent with superior cleaning action
PRINT EMG %100	Blend of ethoxylated alcohols	100	Emulsifier for pigment printing paste
A-PILL %300	Concentrated bio-polishing enzyme		To be diluted 8 – 20 times
A-PER %200	Concentrated peroxide remover enzyme		To be diluted 30 – 50 times
DESIZE %100	Concentrated desizing enzyme 30 - 95C stable		To be diluted 5 – 20 times
ZIP-conc	Anionic aliphatic ester	100	Metal protecting agent for garment dyeing and washing
